

# The Green in Decking

Our Eco Deck Tiles allow you as a design professional, to create a beautiful deck on any exterior hard surface without complicated deck construction.

Our tiles use less wood than a traditional deck, are re-usable and install over existing surfaces. Size options range between 1 sqft tiles to 2 sqft tiles allowing for many design options. We support the design industry and specialize in volume orders and large scale developments.

Products that are re-usable are green. Our tiles can be picked up and used elsewhere saving the material to be used once again. This not only protects your investment in the material but ensures future use of the material in another space.
