

Living Green Lighting

Bringing you new LED technology, every pathway light, walkway light and garden lantern available at Living Green Design Solutions is a unique work of art, handcrafted by artisans. Starting with raw pieces of brass or copper, the artisans cut, bend and shape by hand to create each of our unique designs. Chemical finishes are then applied by hand to ensure quality control.

Illuminating waterfalls, ponds, terraces and dramatic trees, the professional can create an evening wonderland of beauty. Carefree beauty, coupled with artistic design illuminate the glow of sculpted shadows and allow outdoor enjoyment all year round.
